

WinTool 2020.2

Version 21.2.1

Client installations / Update Instructions

- Run setup.exe to install WinTool
- When starting up WinTool for the first time the software application will be linked to the database (WTDData) in the default data directory (Public\Documents\WinTool <Version>)
- Local licenses can be obtained at the following link:
<https://license.wintool.com/webdepot/>

Welcome to WinTool License WebDepot

Welcome to WinTool License WebDepot. You can transfer your licenses to your CmContainer using this WebDepot. Please enter your ticket and click "Next".

Ticker-Nr

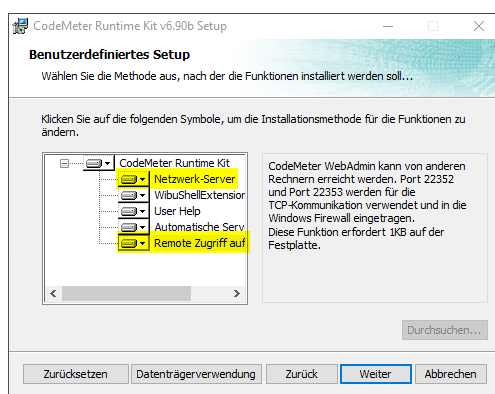

Next

The ticket no. will be sent to you by e-mail.

- Detailed information on licensing, configuration and also usage with SQL Server can be found within WinTool Help

Installation in the Network (Update)

- Floating / plant licenses can be obtained like the local licenses (see above).
- Install or update those licenses on a server that can be accessed by the clients (CodeMeterRuntime / Folder ISSetupPrerequisites)

- After having successfully installed WinTool on all clients, you can re-link them to the "hot database" by using the WinTool DB-Manager which is in the WinTool installation directory. The DB-Manager will upgrade the old database structure. Thereafter the new database is no longer compatible with earlier WinTool versions

System Requirements

System Software: Windows 10
Supported MS SQL Server: MS SQL Server / SQL Server Express 2012 – 2019

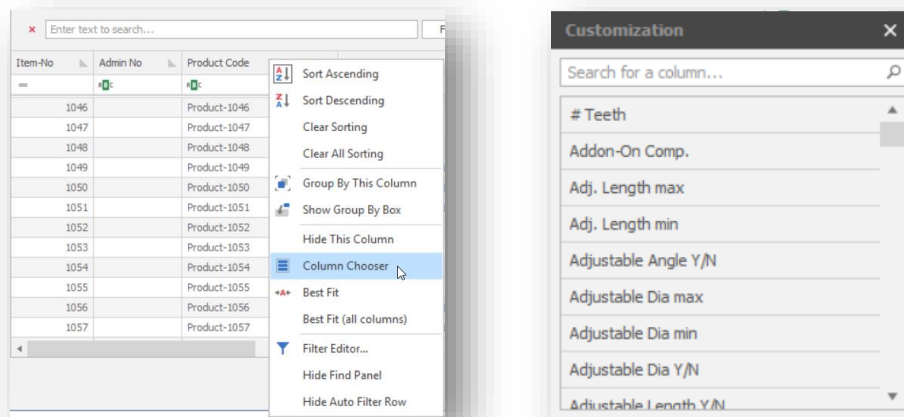

WinTool 2020.2 - Changes

General

- ✓ Optimization and expansion of licensing technology with WIBU CodeMeter
 - Further information on this procedure can be found in the "CodeMeter Administrator Manual", which can be found at the following link: <https://www.wibu.com/uk/support/manuals-guides.html>
- ✓ Various Improvements and corrections
- ✓ Implementation of a new search- and filter technology (DevExpress)

Tools

- ✓ Implementation of new search- and filter technology for components, tool assemblies and tool lists:
 - FIND your tools in WinTool. How would you like to find your tools and what information should be visible? No problem - because you can customize the search window in WinTool as you like.
 - ✓ Create your own search and filter queries
 - ✓ Add columns as you like
 - ✓ Define whether your filter can be used only by you or by all users

CNC Archive

- ✓ Implementation of new search- and filter technology for NC folders and files
 - ✓ Predefined filters for NC folders, files, tool lists and last edited data

Process

- ✓ Implementation of new search- and filter technology for jobs and duplicates
 - ✓ Predefined filters for all jobs, tools setup, in production and jobs completed
 - ✓ Predefined filters for all duplicates, in tool crib, rack tools, on machines

Logistics

- ✓ Implementation of new search- and filter technology for purchasing
 - ✓ Predefined filters for open orders and historic orders
